

Celebrate Canada's 150th Birthday with 150 Trees

Consider celebrating Canada's 150th Birthday with family and friends with the planting of 150 native trees that represents Ontario's Forests and Official Trees. Program Guidelines and Order Form on the reverse.

	<p>White Pine (<i>Pinus strobus</i>) 2+2 year old bare root transplant, 8-14" tall Ontario's Official Emblem Tree and First Nations Symbolic Tree Appearance: Clusters of 5 soft, long needles. Smooth young bark; dark ridged mature bark. Site and soils: Best on well drained to moist sand and loams. Tolerates shade when young. Rural uses: Reforestation, timber plantations. Plant at 6 feet spacing. Can grow 2-3 feet/year once established. Plant under canopy of taller trees to help avoid white pine weevil problems. Grows well with red pine, maple, ash, and beech. Urban uses: Prune for landscaping purposes; sensitive to salt and air pollutants.</p>
	<p>Sugar Maple (<i>Acer saccharum</i>) 2+0 year old bare root, 12-18" tall Native Maple to Ontario Appearance: Deep yellow-green lobed leaves. Smooth, young bark; dark, irregularly-ridged mature bark. Site and soils: Best on deep, fertile, well-drained to moist loams. Tolerates shade when young. Responds well to thinning. Rural uses: Reforestation, maple sugar orchards. Grows well with white pine, hemlock and other broadleaf trees. Urban uses: Sensitive to salt and air pollutants.</p>
	<p>Red Maple (<i>Acer rubrum</i>) 2+0 year old bare root, 12-18" tall Native Maple to Ontario Appearance: Light green (lighter below), lobed, toothed leaves. Smooth, young bark; gray-brown, scaly, ridged, mature bark. Site and soils: Adapted to a variety of soils - wet and dry. Best on moist sites. Tolerates some shade when young. Rural uses: Reforestation, plantations for pulp and timber. Urban uses: Brilliant autumn colour - deep red.</p>
	<p>White (or Paper) Birch (<i>Betula papyrifera</i>) 1+0 year old bare root, 12-18" tall First Nations Symbolic Tree Appearance: Simple, dull green, toothed leaves. Thin, smooth, dark red young bark; white, papery mature bark. Site and soils: Adapted to a wide range of sites. Needs full sunlight. Rural uses: Reforestation. Grows well with pines, spruce, poplar, balsam fir and sugar maple. Urban uses: Common urban tree.</p>

CANADA 150 TREE PROGRAM GUIDELINES

Costs

All orders are \$150.00 which includes administration fees and HST.

Guidelines

- Customer must be willing to pick up and plant the seedlings.
- There is no survival guarantee on any seedlings.
- Order availability is based on nursery availability. Customers will be notified if ordered seedlings are not available.

Ordering

- Orders must be received by the GRCA no later than March 3, 2017.
- Payment is due when orders are picked up.
- Payment options: cheque (Payable to the Ganaraska Region Conservation Authority), Visa, MasterCard, Debit or exact cash.

Order Pick-up

Customers will be notified when seedlings are available for pick up (generally late April or early May). The pick up location will be the Ganaraska Region Conservation Authority Administrative Offices at 2216 County Road 28, Port Hope.

Please note that seedlings come in bags. In most cases a trailer is not necessary for pick-up.
